

Tal Salman

Software Engineer & Automation Architect

Modiin, Israel • tal.salman@gmail.com • linkedin.com/in/tal-salman-60899231 • github.com/talsal

PROFILE

Software engineer with 28 years of hands-on experience building systems across the stack — from core product features in Python, Java, and .NET/C#, to high-scale, end-to-end test automation ecosystems architected from the ground up. A pioneer in bridging traditional software engineering with Generative AI (GenAI) to build intelligent, AI-augmented systems. Comfortable across the full engineering lifecycle — architecture, implementation, CI/CD, and cross-team collaboration across Dev, QA, and DevOps — and equally at home shipping independent products end to end, including a native iOS app published on the App Store.

EXPERIENCE

Automation Architect — CommBox

2025 – Present

- Designed and built a comprehensive QA regression framework from scratch in Python covering the product's core API infrastructure.
- Architected automated testing across omnichannel communication: WhatsApp, SMS, Email, Facebook, Instagram, Messenger, Chat, Voice, and AI Bots.
- Integrated LLMs (Claude, GPT-4, Gemini) into the testing lifecycle for automated data verification and AI-driven failure investigation.
- Orchestrated nightly regression runs via GitHub Actions with real-time reporting to Google Chat and Grafana dashboards.

Automation Lead Analyst (Tools Team) — Veeva Systems

2021 – 2025

- Owned all aspects of automated testing — planning, development, execution, and analysis.
- Built automation frameworks from scratch serving developers and managers, in Java on a Cucumber framework.
- Interfaced GitHub Actions through Slack for on-demand automated runs; managed data environments on Amazon S3 and MongoDB.

Automation Tech Lead (SCADA Cyber Team) — Cyberbit

2016 – 2021

- Technical lead for 3 engineers in a weekly-sprint Agile/Scrum environment.
- Owned full-cycle automated testing for SCADA cyber-domain protocols; developed automation in Python on Linux.
- Interfaced with Elasticsearch and PostgreSQL; integrated with Jenkins for automated execution on every commit and release.

Senior Automation & Performance Lead — SAP (via Matrix)

2014 – 2016

- Led load and performance testing planning, development, and implementation for an SSO product.
- Worked in an internationally distributed Agile Scrum team (Israel & Germany); built automation with JMeter integrated with Chef and Bamboo.

Senior Expert Automation Engineer — AT&T Israel

2012 – 2014

- Built automation infrastructure across Windows, Linux, iOS, and Android using JSystem and Selenium.
- Provided tooling, documentation, training, and tier support to QA teams and developers.

Senior Expert Automation Developer — Traiana

2007 – 2012

- Designed and developed automated test systems in Java, Linux, and shell scripting.
- Advanced Oracle SQL and IBM MQ integration; managed cross-functional projects delivering high-quality releases.

EARLIER CAREER

- Expert Automation Engineer — Tel Aviv Stock Exchange / BackWeb / Clal Insurance (via Tesnet), 2004 – 2007 — led migration from manual testing to QTP/WinRunner automation.
- Software Engineer, Logging & Storage Group — NICE, 2002 – 2004 — developed core storage features in .NET C# with SQL databases.
- Automation Team Leader — NICE, 2000 – 2002 — led a team of 3 building 3-tier client-server automation frameworks in Delphi.
- Automation Developer — Tesnet, 1998 – 2000 — delivered automation/load testing projects for Intel, ECI, and Visa.

TECHNICAL SKILLS

Languages	Python, Java, .NET/C#, SQL, Shell Scripting, Delphi, Swift, C, C++
AI & Data	Claude, GPT-4, Gemini (GenAI/LLMs), MongoDB, PostgreSQL, Elasticsearch, Oracle, MySQL
Automation	Selenium, Cucumber, JMeter, JSystem, PyTest, UFT/QTP, WinRunner, LoadRunner
CI/CD & DevOps	GitHub Actions, Jenkins, Bamboo, Chef, Git, AWS (S3), Docker, Linux, Grafana

PROJECTS

- **Daily Secret Address** — Kabbalah-based daily-content app; published on the Apple App Store, then rebuilt as a cross-platform web app. Offline daily computation, home-screen widget, notifications. talsal.github.io/daily-secret-address-web
- **Playlist Viewer** — searchable media hub for a personal recordings archive, with custom playback controls and keyboard shortcuts. talsal.github.io/playlist-viewer
- **Yosef-Ly Synagogue Site** — full community website: prayer times, events, membership, donations. talsal.github.io/yosef-ly-synagogue

EDUCATION & MILITARY SERVICE

- B.Sc. in Software Engineering — Holon Institute of Technology (HIT), 1994 – 1998
- Computing NCO, Israeli Air Force, 1990 – 1993 — developer for the MAGIC anti-aircraft maintenance system
